Technical Expertise:

Languages: Python (6+ years), Unity, C# (5+ years), Android Studio, Kotlin, Flutter, Dart, MySQL, T-SQL

Frameworks: REST APIs, Object-Oriented Programming, Git

Platforms: Windows, Android, Virtual Reality, Mixed Reality

Programming Experience:

Shulert

Co-Founder / Software Developer | 02/2019 – Present
- Leading development of a full-stack cross-platform app with features including location-based points-of-interest, device sensor utilization, in-app purchases and user accounts.
- Chairman of the Board of the nonprofit organization.
- Featured in 2 news outlet appearances.
- Garnered over 11,000 downloads and maintains a consistent all-5-star review rating across Android and iOS.
- Compatible with all leading web and content filters.

Squared Solutions

Back End Developer | 02/2024 – 04/2024
- Orchestrated the development of a proprietary SaaS platform, harnessing API integration to consolidate data from multiple sources, bolstering client access and insights.
- Implemented threading techniques to optimize performance, enabling seamless execution of CRUD operations at scale, processing tens of commands per second.
- Spearheaded extensive code refactoring initiatives, addressing issues ranging from typographical errors and absent functions to rectifying improper method application, enhancing overall codebase integrity and efficiency.

Meta

Contracted Game Developer | 04/2023 – 11/2023
- Created a Mixed Reality demo for Meta Quest headsets, optimizing PBR environments for high frame rates.
- Provided valuable feedback to improve Meta's SDKs and documentation.
- Managed a team to deliver game assets on time and within budget.
- Oculus Start Member since 2019.

GIB Games

Game Development Intern | 07/2021 – 09/2021
- Enhanced VR games for improved accessibility and conformity to coding standards.

Personal and Freelance Projects:

Collapsus | *Discord Bot*	*05/2022 | 2,000+ users*
